Overview of the EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfield sites. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Small Business Liability Relief and Brownfields Revitalization Act of 2002, as amended by the Brownfields Utilization, Investment and Local Development Act of 2018, was passed to help states and communities around the country clean up and revitalize brownfield sites. Under this law, EPA provides financial assistance to eligible applicants through five competitive grant programs: Multipurpose Grants, Assessment Grants, Revolving Loan Fund Grants, Cleanup Grants, and Job Training Grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$1,900,000

EPA has selected the City of North Adams for a Brownfields Cleanup Grant that will be funded by the Bipartisan Infrastructure Law. Grant funds will be used to clean up the Former Tannery Dump located on Ashton Avenue. The cleanup site was formerly a dumping site and contains a 1.5-acre, 10-foot-high mound of leather scraps that abuts the Hoosic River and is contaminated with heavy metals. Extreme storms have exposed the layers of leather on the riverbank. Grant funds also will be used to conduct community engagement activities.

For further information, including specific grant contacts, additional grant information, brownfields news and events, and publications and links, visit the EPA Brownfields Web site (<http://www.epa.gov/brownfields>).

The information presented in this fact sheet comes from the grant application; EPA cannot attest to the accuracy of the information. The cooperative agreement is negotiated after the selection

announcement. Therefore, the funding amount and activities described in this fact sheet are subject to change.
