**Re: Declassification Activity-Health and Safety Filing
8EHQ-94-12887 (EPA DCN 88940000129)**

Dear Sir/Madam:

The Procter & Gamble Company (P&G) provides this submission to amend the Public Display Version of our submission pursuant to the TSCA Section 8(e) requirements.

This amended submission is composed of the following:

- (a) new information provided in this cover letter and its attachment(s); and
- (b) the unaltered original submission which directly follows.

Any CBI substantiation which appears in the original submission is no longer applicable as the information which was originally claimed CBI is disclosed in this revised submission.

Should you have any questions concerning this amended submission, please contact me at (513) 983-2531 or froelicher.jm@pg.com.

Sincerely,

THE PROCTER & GAMBLE COMPANY

RE: TSCA Section 8(e) Submission

ATTN: TSCA Section 8(e) Coordinator

This submission is made in accordance with TSCA Section 8(e) requirements. This communicates data on the effects of the oral administration of the alcohol ethoxylate mixture described in Attachment 1. These data were generated from an acute oral toxicity study in mice.

A total of 6 mice (3 males, 3 females) received 5 ml/Kg dosage (oral gavage) of an alcohol ethoxylate mixture. Negative (water) and positive (60% Ethanol) control groups were also included. Clinical observations were made prior to dosing and continuous for the first two hours. Animals were observed for lethality twice a day until the termination of the study.

At 5 ml/Kg, 2/6 animals showed signs of ataxia. The onset of ataxia was 7 minutes which lasted in decreasing severity for up to 5 hours. There was no lethality during this study.

We have used the test material for R&D purposes only. We have handled and will continue to handle this material with appropriate caution in our laboratory work in keeping with our standard procedure for handling all chemical substances. We will continue our practice of communicating appropriate hazard information for the test substance by both labels and MSDS.

We are requesting that the specific identity of the test material be treated as confidential information in this submission. We have not publicly disclosed any business interest or plans regarding the test material. Measures to protect confidential information include "need to know" internal restrictions within the Company, confidential disclosure agreements with potential suppliers, and confidentiality restrictions imposed upon information shared with the agency. Security at our technical centers is excellent and knowledge of R&D activities pertaining to this material has been carefully restricted to employees who have a need to know. Disclosure of the specific chemical identity of the test material would provide

competitors with valuable knowledge which is not otherwise available and which could significantly reduce the competitive advantage normally associated with the development and commercialization of new products

Please note that we have bracketed the information which we regard as legally confidential. This bracketed information has been deleted from a second, public display version of this submission. In the event of a proposed disclosure, notice should be given to J. T. O'Reilly at 513/983-4225.

If you wish further information, please contact me.

Very truly yours,

THE PROCTER AND GAMBLE COMPANY
